LUXURY FIREPLACES

Intelligent Simplicity

By combining cutting edge contemporary design, high energy efficiency, class-leading running costs and innovative technology, Escea has created a range of world-class luxury fireplaces for use indoors or out.

“Excellence in design coupled with a focus on energy efficiency ensures your new Escea fireplace will become the focal point of your home. The atmosphere created will make your living space the envy of all those who share in its warmth and style; you will congratulate yourself daily for choosing an Escea fireplace.”

Nigel Bamford
CEO, Escea

BLACK GRANITE VERTA (EF5000)

Simply Exceptional

Exceptional homes demand exceptional features. No home is complete without the luxurious warmth and soothing ambience of a stylish yet environmentally friendly fireplace in the living space or outdoor entertainment area.

Because a fireplace will always be the centre of attention, it should be beautiful, efficient and easy to use. Escea fireplaces combine innovative contemporary design with quality of the highest magnitude.

Escea fireplaces can be installed just about anywhere. Their zero rated approvals allow them to be built directly into timber and plasterboard false chimney breasts or existing masonry chimneys. Unlike many other fireplaces on the market, wall construction with expensive heat-resistant materials is unnecessary. Escea indoor fireplaces are approved to be sited directly below a wall-mounted TV screen, allowing enjoyment of the fire and TV at the same time, while offering intriguing design opportunities.

SUEDE CREAM FERRO (ST900)

Eco-friendly Comfort

For every fireplace built a tree is planted.

Not only does Escea design and produce fireplaces with energy efficiency and environmental impact in mind, but a tree is also planted for every fireplace produced.

STAINLESS STEEL FERRO (EW5000)

Handcrafted Perfection

Every single fireplace that leaves the Escea factory receives the same care and attention as if it were the first.

The dedicated team of craftsmen take great pride in finishing Escea fireplaces to the high standard for which they are well known around the world.

Unique Design

Indoors or outdoors, Escea believes there should be a choice of style to ensure the fireplace complements the décor in your home and makes the style statement you have been seeking.

Escea's team of passionate designers constantly strive to create fireplaces that add an element of sculpture and art to your living space. Some Escea fascias come with both indoor and outdoor options, allowing you to maintain a design consistency throughout your home.

STEEL FASCIAS

The Ferro range of fascias stylishly frames the Escea flame and unique fuel bed options.

COLOR COATED

A wide variety of colors are available for this fascia, allowing you freedom and versatility in matching your décor.

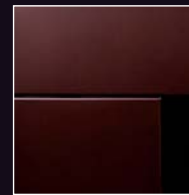

STAINLESS STEEL

Striking, clean lines are coupled with a stunning stainless steel surface which reflect the colors, textures and shapes from within the room, creating a look that instantly is at one with the living space.

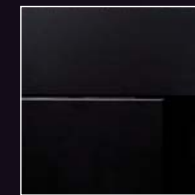

FERRO FASCIAS ARE AVAILABLE IN:

Verta

STAINLESS STEEL FASCIAS WITH INSERTS

The high grade stainless steel Verta fascia comes with a variety of inserts that create a wonderful personalized effect.

The range of attractive inserts include natural stone - granite and travertine - and ancient preserved Kauri wood extracted from swamps in New Zealand. Alternatively, to match your room décor, you can supply your own inserts.

VERTA FASCIAS ARE AVAILABLE IN:

	ST900 Indoor Fireplace	EF5000 Outdoor Fireplace
Ancient Kauri*	Yes	No
Black Granite*	No	Yes
Cream Travertine*	No	Yes
User supplied**	No	Yes

*Stone and wooden inserts are natural materials that may vary in appearance from these illustrations.

**Certain material restrictions apply. See technical specifications on website for details.

30,000 YEAR OLD
NEW ZEALAND
KAURI**

These unique Kauri inserts are made from wood preserved in the swamps of New Zealand for thousands of years. Ten times older than the Egyptian pyramids, this wood has been carefully removed and lovingly cut and polished for discerning owners. Each fascia comes with a certificate authenticating the Kauri inserts as being over 30,000 years old.

ANCIENT KAURI VERTA (ST900)

Velo

PICTURE FRAME FASCIAS

The Velo fascia is a frame within a frame, creating a minimalist look thanks to clean straight lines.

The Velo beveled fascia creates a picture frame, drawing one's eyes to the flames whilst at the same time maintaining a minimalist look. The fascia subtly protrudes from the wall and can be installed floating on the wall or alternatively sitting on a hearth.

VELO FASCIAS ARE AVAILABLE IN:

	ST900 Indoor Fireplace
Florentine Bronze	Yes
Metallic Silver	Yes
Satin Black	Yes

METALLIC SILVER VELO (ST900)

Molaris

NATURAL STONE FASCIAS

The Molaris fascia is a thick slab of natural stone that floats off the wall.

These natural stone fronts add substance and tradition to the fireplace, while at the same time keeping the simple modern look that epitomizes Escea.

MOLARIS FASCIAS ARE AVAILABLE IN:

	ST900 Indoor Fireplace
Black Granite*	Yes
Cream Travertine*	Yes

*Stone is a natural material that may vary in appearance from these illustrations.

Flames

We all love the comforting, mesmerizing effect that flames bring to our rooms. The ambience and wellbeing created by the sight of flames and glowing fuel bed cannot be overestimated.

Escea gas fireplaces offer an impressive display of flames, even when turned down low. Because we each have our own individual preferences, Escea offers a large range of fuel beds to choose from.

AVAILABLE FOR:

	ST900	EF5000
Crystalight	Yes	No
Driftwood	Yes	No
Indoor Rocks & Coals	Yes	No
Outdoor Rocks & Coals	No	Yes

INDOOR ROCKS & COALS

White or black coals are great for creating contrasts in your décor while river rock stresses an appreciation of the great New Zealand outdoors and presents a softer, more natural feel.

Black Coals

New Zealand River Rock

DRIFTWOOD

Burning wood is still the favourite for many, recreating the look of the traditional open fireplace.

Driftwood with White Stones

White Coals

CRYSTALIGHT

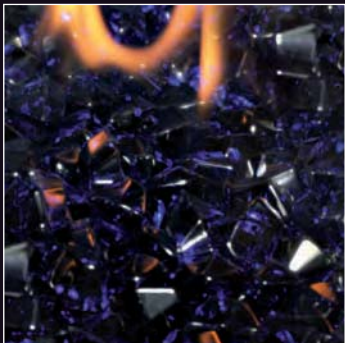

Like precious stones, this fuel effect creates a high end, modern look, magically reflecting moving flames from many facets. Available as Transparent, Royal Blue and Black.

Transparent Crystalight

ST900

DIRECT VENT INDOOR FIREPLACE (GAS)

FLORENTINE BRONZE FERRO

SATIN BLACK VELO

CREAM TRAVERTINE MOLARIS

The sleek ST900 is a fireplace that uses only a small amount of energy and offers flexibility in design and installation.

The ST900 fireplace looks great and there is a stunning range of fascias and fuel effects available. This fireplace uses only 1/3 of the gas of an equivalent size open fireplace and is completely silent in operation. It is ideal for adding ambience and additional warmth to a house with central heating, and is suitable for use in smaller rooms such as home theatres or even bedrooms.

Thanks to its shallow depth, direct vent flue system and zero rating, the ST900 models can be installed almost anywhere (including below a television).

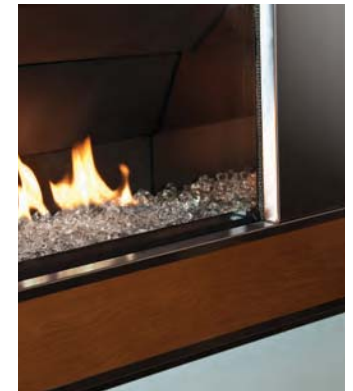

With no reliance on mains electricity, ST Series fireplaces still operate during power outages.

ENERGY INPUT: 13,000 - 17,000 BTU/h

WIRELESS CONTROL

The ST900 comes with wireless remote control which can be used to light the fire and to adjust the flame. A built-in thermostat allows the desired room temperature to be set while a 7-day timer allows for automatic control of the fireplace.

REFLECTIVE PANELS

When you want the look of an ultra-wide fireplace, these reflective side panels create the illusion of width. The mirror-like surface on the side walls provide a stunning reflection for dancing gas flames and the fuel bed.

DIRECT VENT

The ST900 uses a direct vent which is a "sealed combustion system". The air for combustion is drawn through the venting system from outside thus avoiding draughts and eliminating the risk of combustion by-products entering the room.

Direct vent systems offer many options for locating the fireplace as the flue can terminate either up and through a roof or simply out through an external wall.

EF5000

VENT FREE OUTDOOR FIREPLACE (GAS)

Just because it's a little cool outside doesn't mean you have to stay indoors. This Escea outdoor gas fireplace lets you enjoy the open air whilst still staying warm.

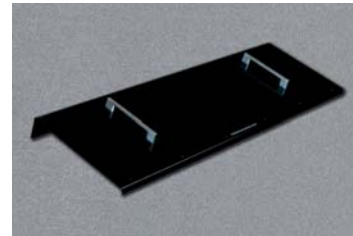

An Escea outdoor fireplace is a natural focus for any outdoor gathering, adding sophistication and ambience to any occasion.

The innovative design means no flue is required, making installation simple. Because this gas fireplace is zero rated, it can be installed straight into any timber-framed external construction, suitable wall or masonry cavity.

CONTROL PANEL

The EF5000 comes with a push button control panel discreetly situated on the right side of the stainless steel fascia. From here you can ignite the fire as well as adjust the flame height for extra warmth and viewing pleasure.

WEATHER SHIELD

This optional shield protects your gas fireplace when not in use. Made from stainless steel, it simply sits over the top of the fuel bed and onto the back of the firebox to protect the gas burners from rain, wind and debris.

KIT SET ENCLOSURE

The Kitset Enclosure (KSE) consists of a ready-to-be-assembled steel frame and fastenings. Once assembled you can then cover the KSE with a waterproof backing board and cladding of your choice. The assembled structure has the following dimensions: 71w x 47-1/2 h x 23-1/2d (inches)

ENERGY INPUT: 26,000 - 56,000 BTU/h

STAINLESS STEEL FERRO

CREAM TRAVERTINE VERTA

FLORENTINE BRONZE FERRO

EW5000

OUTDOOR COOKING FIRE (WOOD)

The EW5000 adds a dramatic center point to any outdoor entertaining area, while its large cooking surface allows you to enjoy BBQ cooking the way it was meant to be done.

The firebox is constructed of high quality heavy weight steel coated with heat resistant paint to ensure a long life.

This outdoor barbecue fire needs to be enclosed by a non-combustible structure such as masonry, stone, concrete or brickwork. Escea can provide a ready to build steel frame enclosure (KSE) which can be finished with a suitable fireproof material of your choice.

COOKING PLATE

To allow you to enjoy BBQ cooking, the EW5000 features a cooking plate which can be placed at three different heights to regulate heat. When not in use, the plate can be conveniently stored under the ash pan.

FRAMELESS OPTION

The EW5000 can be installed with or without the Stainless Steel Ferro fascia. The frameless look gives a more traditional option and can be installed flush or recessed into your non-combustible fire surround.
