P.4 EFFICIENCY NG	74.4%
P.4 EFFICIENCY LP	74.4%
AFUE	73%
GLASS SIZE	340 SQ.IN.

An exceptional performer with classic good looks, the Trenton cast iron freestanding gas stove combines allure of traditional design with today's modern gas technology. Heavy cast iron retains and evenly distributes heat from the top and sides of the stove, providing even, constant heat throughout the room. Decorative doors swing open to reveal an unobstructed window of full, rich flames over a stacked logset. The gentle play of fire is further reflected across the backdrop of lustrous titanium porcelain enamel interior panels, enhancing the dramatic play of flames within the firebox.

In keeping with the timeless elegance of cast iron, the Trenton is available in a palette of traditional finishes: painted Metallic Black or porcelain enamel in Antique White and Majolica Brown.
