LINEAR GAS FIREPLACE

Cool Surface System HDK

In the past, wall mounted televisions or treasured decor pieces would degrade over time from the excess rising heat produced by your gas fireplace. Our new Cool Surface System for the C Series allows you to make use of the valuable real estate directly above your linear gas fireplace. It can channel heat inside the wall and vent it out above the fireplace.

Opening bezel can be painted to blend with wall color

Dual vents reduce surface temperature and evenly channel rising heat

Side vent configuration allows heat to be vented to the left and right

These side ducts can be installed in a horizontal or vertical format and high temp paint (250ºF) can be used on the opening bezels to blend with wall color

Optional Surround
Create stronger focus on the flames by adding a brushed nickel, brushed antique copper, brushed black nickel, or powder coated borderview surround.

Cool Surface System HDK
This heat distribution / TV kit channels hot air away from wall mounted TV's placed directly above the unit. It is available in front facing or side vent configurations.

Hidden Pilot System
The C Series uses a hidden pilot system diagonally recessed on a far edge so as not to obstruct the overall look of the burn.

Optional Dual Blower Kit
This optional 220 CFM fan assembly operates with a left and right fan to help evenly push warm air further into the room.
