## Cool Surface System HDK

In the past, wall mounted televisions or treasured decor pieces would degrade over time from the excess rising heat produced by your gas fireplace. Our new Cool Surface System for the C Series allows you to make use of the valuable real estate directly above your linear gas fireplace. It can channel heat inside the wall and vent it out above the fireplace.

**SIDE VENT (L&R) | Part: #50-3455**

Side vent configuration allows heat to be vented to the left and right

These side ducts can be installed in a horizontal or vertical format and high temp paint (250ºF) can be used on the opening bezels to blend with wall color

**FRONT VENT | Part: #50-3463**
(C34/C44/C60) & Part: #50-3713 (C72)

High temp paint (250ºF) can be used on the opening bezel to blend with wall color

Dual vents reduce surface temperature and evenly channel rising heat
