ZIROTM

Solaira is proud to introduce our new line of **ZIRO** Radiant Infrared Heaters. These premium products feature the quality and dependability found in every Solaira heating product, but introduce a new technology which allows for powerful radiant comfort heat generation while emitting **NO LIGHT**.

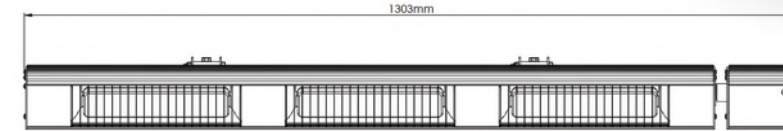

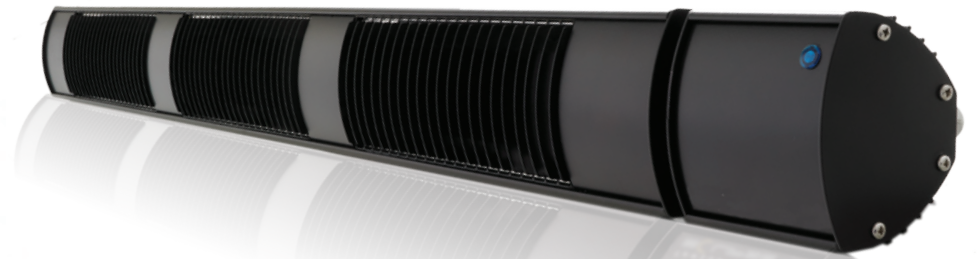

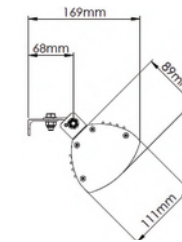

Solaira **ZIRO** Heaters feature state-of-the-art design and engineering, incorporating the most advanced ceramic heating technology on the market. These heaters emit radiant heat which warms people and objects while providing maximum energy efficiency - converting over 96% of consumed energy into radiant comfort heat.

Solaira **ZIRO** heaters are constructed of durable, epoxy powder-coated, 6063 aircraft-quality aluminium. They feature sleek, modern styling that compliment commercial or residential areas such as terraces, enclosed patios, restaurant hostess/waiting areas, clubs, pubs or anywhere else you or your customers would enjoy comforting warmth!

Solaira **ZIRO** Series Heaters are fully waterproof, virtually maintenance-free, and can be used indoors or out, year round. They are also compatible with Solaira's range of controls and dimmers.

Z3

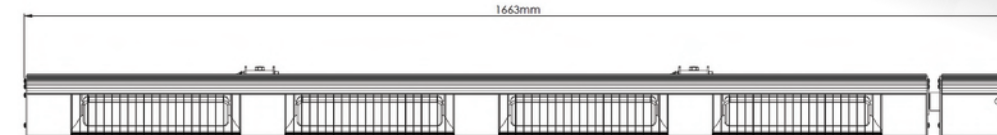

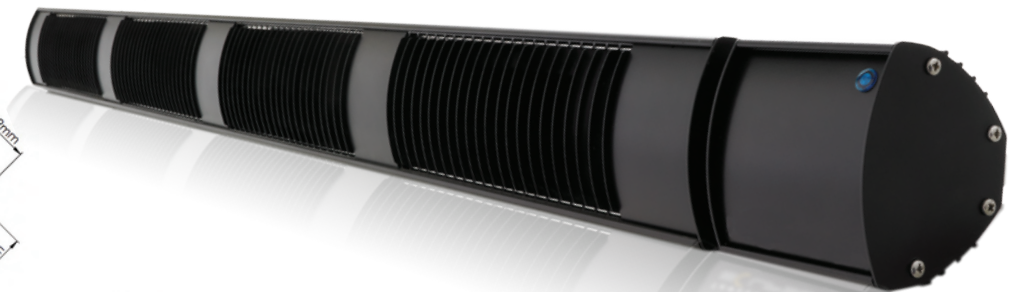

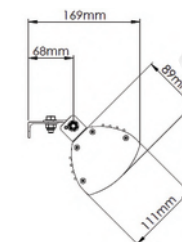

3-LAMP RADIANT HEATING SYSTEM
PART NO. Z18240B

Not recommended for breezy environments, Solaira Short Wave recommended for breezy areas

Z4

4-LAMP RADIANT HEATING SYSTEM
PART NO. Z24240B

Not recommended for breezy environments, Solaira Short Wave recommended for breezy areas

WEATHER PROOF
TECHNOLOGY

MODEL	PART#	COLOR	WATT	VOLT	AMP	DIMENSION mm /inch (L,H,D)
Z3 3-lamp	Z18240B	Black	1.8kW	208-240V	7.5 A	1303/52 x 111/4.5 x 169/7
Z4 4-lamp	Z24240B	Black	2.4kW	208-240V	10.0 A	1663/65.5 x 111/4.5 x 169/7

All Commercial heaters should be installed by certified electrician to local and state electrical codes

KEY FEATURES

- Emits **NO LIGHT** while generating heat
- Advanced ceramic heating technology provides up to 35% more energy efficiency than comparable no light, black panel heaters*
- Weatherproof casing constructed of black, epoxy powder-coated aircraft quality aluminum
- Converts over 96% of consumed energy into medium wave infrared heat
- Fully compatible with Solaira's range of controls and dimmers

* as compared with radiant infrared heaters with emitter surface temperatures below 350° F
