DEL

Framing Depth

Both The DelRay 36" and 48" fit easily into a 14¼" framing depth

THE PERFECT COMPANION TO TODAY'S DESIGN TRENDS OF MINIMALISM & CLEAN LINES **DELRAY**

Venting Kits

Everything to complete your direct venting system in one kit. Comes complete with termination, wall thimble and flex pipe

Conversion Kit

Convert to propane in minutes with our simple drop in burner system

RAY

Trim Kits

For uneven and ledgerstone finishing, we developed a slim finishing kit that fits directly to the fireplace frame to conceal the finished edge.

These kits are adjustable and can cover finishing depths up to 2"

MONTIGO

Features

Meets requirements for efficiency rebates

14¼ framing depth

Mobile home compatible

Convertible to co-linear venting

Header must be on edge to meet clearance to venting

DELRAY LINEAR COMBUSTIBLE FACING

Minimum 6' chase
(When venting ports open or
using cool wall kit)

Combustible surround flush to
opening (included cement board
optional when venting ports open
or using cool wall kit)

Open venting ports
(or heat diversion kit)

IMPORTANT

Leaving the venting ports open requires a
minimum chase height of 6'
(see below for sizes)

DRL36

Minimum 70² inch opening

DRL48

Minimum 100² inch opening

1976: The Days Before Gas Fireplaces

In 1976, Montigo president and founder, Dan Binzer, started installing zero-clearance wood burning fireplaces for local builders in Vancouver, BC. Over the years, demand grew for a gas alternative, and Dan engineered and manufactured the first ever sandpan logset. The logset was installed in a zero-clearance wood burning fireplaces shell, resulting in one of the first zero-clearance gas fireplaces on the market.

1985: Gas Fireplace Manufacturing Begins

Demand for gas grew rapidly, especially among multi-unit developments so Dan Binzer started a company called Canadian Heating that would offer full service design, engineering and manufacturing for gas fireplaces. Under the Montigo brand, Canadian Heating began manufacturing and selling a wide selection of zero-clearance gas fireplaces throughout Canada and in 1985 development began for the latest and greatest in gas fireplace technology – direct venting.

1994: Manufacturing Excellence is Achieved

Development and advancement of the gas fireplace continued over the years with continual developments to improve the efficiency of the fireplaces and perfected manufacturing processes to deliver an optimum fireplace each and every time – even for completely custom units.

Present: Leading the Way with Modern Fireplace Design

As one of the first to bring a linear designed fireplace to market, Montigo now offers the largest selection of linear fireplaces demanded by designers, architects and homeowners wanting to create a modern and contemporary space and homeowners wanting to create a modern and contemporary space.

WARNING

Some materials used in the manufacturing process of this product can expose you to Benzene which is known in the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov
