**Glass Tray Required*

VENTED CHASE OPTION

The chase of the appliance may be vented to achieve Cool Touch Walls or reduced Mantel Clearances.

The following options are available to vent the chase:

- The top of the chase can be left open.
- A grill can be installed on the front of the chase.
- If the chase bumps out into the room, side grills can be installed on each side of the chase.

See illustrations and manual for further information.

Minimum enclosure height for a vented chase is measured from bottom of fireplace, ventilation of minimum free air opening is required. Choose between our Enclosure Grills (Front or Sides) for adequate ventilation opening as stated in the manual. Grill or opening must meet minimum (as specified in the installation manual) of chase top/ceiling.

Open chase framing with enclosure min. below ceiling

Framing to ceiling with open front

Framing to ceiling with front or side vents

Framing to ceiling with vents at front and back

Minimum enclosure with front or side vents

Framing to ceiling, minimum enclosure with front or side vents

Minimum enclosure with front and back vents

NOTE: To vent the fireplace chase, removal of vent shields from the fireplace is required.

Unit Illustrated: ZCVRB60NE Zero Clearance Direct Vent Gas Fireplace (Natural Gas), ZCVRB60S1SS Surround Stainless Steel, MQEMBER Ember Chunks, MQRBD3 Driftwood Log Set, MQVL60RLSB Liner (Stacked Brick).

Marquis Fireplaces maintains a program of continuous testing, refinement and improvements of all its products. Some aspect of units shown here may be changed at any time without notice or obligation.

Certification: Certified to ANSI Z21.88-19, CSA 2.33-19, CSA 2.17-2017 Vented Gas Fireplace Heaters.

Note: Components may have to be ordered separately to create a complete unit. Discuss with your local Marquis Dealer for clarification.
