### Each unit factory tested

Refer to the installation manuals for complete installation & venting requirements. See additional mantel clearance configurations in the installation manual.

## Callaway 50

## Outdoor Covered Fireplace Install

- Fireplace operation is approved from 40 degrees F to 110 degrees F
- All wiring connections shall be in accordance with outdoor requirements of NECA NFPA 70
- All clearances and requirements in your appliance manual must be adhered to

The overhang (A) must be a minimum of 1/2 or greater of the roofline elevation (B) above the base of the fireplace.

The width of the overhang to each side of the appliance (C) must be a minimum of 1/2 or greater of the roofline elevation (B) above the base of the fireplace.

**EXAMPLE:** If roofline (B) is 10 ft. about the base of the fireplace, the overhang (A) must be 5 ft. or greater. The width of the overhang to EACH side of the fireplace (C) must be 5 ft. or greater.

Fireplace brochures are for advertising purposes only. Refer to the specific fireplace manual for installation.

## Kozy 'Heat Distribution'

### Direct Vent No Heat Distribution

### Vented Cavity

#### Callaway 72 Only

Callaway 72 offers the option to leave a minimum sized opening in the fireplace cavity. This installation option allows for combustible facing materials (shiplap, barn wood), heat reduction for a TV above the fireplace, and the ability to bring a 6" mantle down to the 3/4" finishing edge of the fireplace. See installation manual for complete details and requirements.

### Komfort Zone Kit

This kit requires (4) 5" aluminum flex pipes for the Callaway 50 & (6) 6" aluminum flex pipes for the Callaway 72, to be ran into a plenum that can be installed above the fireplace and divert a large portion of radiant heat. This installation option allows for combustible facing materials (shiplap, barn wood), heat reduction for a TV above the fireplace, and the ability to bring a 6" mantle down to the 3/4" finishing edge of the fireplace. See installation manual for complete details and requirements.

### Exterior Transfer Kit

#### Callaway 72 Only

The exterior heat transfer kit allows you to transfer heat directly outside. Up to 80% heat diffusion (2 kits) - 3' Min. - 25' Max. with variable speed control included

### Interior Transfer Kit

#### Callaway 72 Only

Transfer heat from the fireplace directly to other rooms in the home with an interior heat transfer kit. Allows up to 25% Heat Distribution (2 kits) - 3' Min. - 25' Max.

### Power Vent

#### Callaway 72 Only

The Callaway 72 has been approved for horizontal power vent applications. See installation manual for complete details and requirements.

- 6-5/8" x 4" Venting
- 100' Max. Run (60' Vertical/ 60'Horizontal Run Max.)
- 8' Max Vertical Drop Allowed
- Max. 8 - 90° Elbows (or up to 16 - 45° Elbows)
- Kozy Power Vent (KPV) System.

Wiring Harness Required and Sold Separately

In order to continually provide the highest quality product available, features/options, specifications & dimensions are subject to change. Refer to the unit installation manual for complete installation instructions. Installation must conform with local building codes. **In some regions it may be possible that this appliance qualifies for an energy rebate. See your local dealer for details regarding promotions and qualifications.**
