# VERSATILE, FUNCTIONAL ART

Aurora suspended Fires are the exclusive manufacturers of suspended fireplaces in Australia.

We are dedicated to:

- 🔥 SUPPORTING AUSTRALIAN INDUSTRY
- 🔥 HIGH QUALITY AUSTRALIAN MADE PRODUCTS
- 🔥 EXCEPTIONAL CUSTOMER SERVICE

## How do we work?

Aurora Fires are securely connected in the roof space on a stainless steel ceiling bracket which is custom made to fit the pitch of the customer's ceiling.

A stainless steel ball bearing system connects the firebox to the lower flue, enabling the fire to be rotated around 360°. This unique feature allows the fire to be easily directed to face any part of the room.

Aurora Suspended Fireplaces are open fireplaces, available as wood burning, bioethanol or a wood/bioethanol hybrid and come in a range of sleek finishes.

Their elegant design, 8.2kW heat output, 360° rotation and pizza oven functionality combine to create a versatile and functional piece of art at an affordable price.

MERGING TRADITION WITH THE OPPORTUNITIES AND POTENTIAL OF MODERN LIFE, AURORA FIREPLACES OFFER A STUNNING FOCAL POINT FOR ANY INDOOR OR OUTDOOR SPACE.

# THE AETHER

Versatile, functional art. Perfect as both a modern indoor fireplace or on the deck, this Australian-made suspended fireplace is available as both wood burning or bioethanol fuelled.

The Aether enables you to finish off your indoor or outdoor living space, combining the restorative properties of fire with a contemporary designer fireplace.

## DIMENSIONS, WEIGHTS & SPECIFICATIONS

Firebox diameter	900mm
Firebox weight	55kg
Flue diameter	165mm
Flue weight	12kg/m
Standard bracket weight	23kg
External flue kit (triple skin)	152/203/254mm
Grate weight	22kg
Heat output	8.2kW

🔥 Stainless Steel ball bearing  
360° rotation system

🔥 Finish: Heat Resistant  
to 650°C

🔥 Flue custom length  
with damper

# BIO ETHANOL SUSPENDED FIRES

**CLEAN HEAT  
BIO ETHANOL  
IS THE FUEL OF  
THE FUTURE,  
TODAY.**

- 🔥 BIO ETHANOL IS AN ECO FRIENDLY FUEL THAT BURNS CLEAN AND HAS A MINIMAL CARBON FOOTPRINT.
- 🔥 UNLIKE FOSSIL FUELS, BIO ETHANOL ISN'T A FINITE FUEL SOURCE, WHICH MEANS IT'S RENEWABLE.
- 🔥 THE FACT THAT NO FLUE OR CHIMNEY IS NEEDED MEANS MOST OF THE HEAT GENERATED STAYS IN THE ROOM.
- 🔥 BIO ETHANOL CONVERTS INTO A FINE WATER VAPOUR WHEN BURNED. IT IS THEREFORE VERY CLEAN.

# HOW DOES IT WORK?

## Bioethanol Fireplaces

The fireplace (the Aether or the Hearth) is fitted with either a scope 340 EcoSmart grate insert & stainless steel burner or an EcoSmart XL500 burner which both use bioethanol fuel. The burner comes fitted with a grate designed for our fireboxes.

It does not require an external flue, therefore the flue terminates in your ceiling with the suspension bracket. As bioethanol gives off nothing but water vapours there is no need for an active flue. The flue is therefore capped internally below the suspension bracket so that there is no heat transference into your roof space.

## Bioethanol/Wood Hybrid

The EcoSmart burners make transforming any of our suspended wood fireplaces into a contemporary, eco-friendly bioethanol fireplace so simple. This is a fully flued wood fireplace that ships with two grates; one for burning wood and one for burning bioethanol.

The bioethanol grate comes fitted with your selected EcoSmart Burner. Choose from the XS340 or the XL500. When you wish to burn wood you simply remove the bioethanol grate & burner and insert your wood grate. This is a great option for those who are looking for an occasional ambient alternative to the power of their wood fire.

Visit the Ecosmart site for more on Bio Ethanol Fuel:

# OUR RANGE OF BIO-FUEL FIRES

• EcoSmart XS340 Burner

ecosmart<sup>+</sup>  
Fire

## EcoSmart XS340 FIREPLACE WITHOUT THE FUSS

More compact than the XL Series, the XS340 is a slim-lined burner with minimal clearance requirements. Its stainless steel construction ensures not only long term durability but reliability under all conditions and temperatures. The XS340, like all our bio ethanol burners, comes with a set of accessories (extendable lighting rod, lighter, and no-spill refilling jerry can) to make operation safe and simple.

### DIMENSIONS & SPECIFICATIONS

Dimensions	W: 190mm   L: 340mm   D: 76mm
Materials	Stainless Steel Grade 304
Application	Indoor & Outdoor
Capacity	2.5 Litres (2.6 Quarts)
Heats	215ft <sup>2</sup> (20m <sup>2</sup> )
Burn Time	5 Hours
Thermal Output	8.9 MJ/h   8530 BTU/hr   2.5 kW/hv

## EcoSmart XL500 XL SERIES - THE LONGEST FLAME

The EcoSmart XL 500 operates under all conditions, at all temperatures, every time – reliable, consistent and reassuring. Made with 304 grade stainless steel, the XL500 burns a vibrant, orange flame that can be enjoyed when installed either indoors or out. The XL500, like all our EcoSmart bio ethanol burners, comes with a set of accessories (extendable lighting rod, lighter, and no-spill refilling jerry can) to make operation safe and simple.

### DIMENSIONS & SPECIFICATIONS

Dimensions	W:195mm   L:500mm   D:112mm
Materials	Stainless Steel Grade 304
Application	Indoor & Outdoor
Capacity	5 Litres (1.3 Gallon)
Heats	431ft <sup>2</sup> (40m <sup>2</sup> )

Diameter	The Sol & The Sunne   700mm The Helios   1200mm
Depth	400mm
Material	Steel
Colour	Matte Black

• Made in Australia by Aurora

## Fire guard

This fire guard is designed with style and simplicity in mind. Constructed from perforated stainless steel, it is designed to sit just below the bottom lip of the firebox, keeping people at a safe distance without obstructing the beauty of your Aurora.

The guard has three panels, all of which are hinged allowing you to arrange the panels according to your needs. It folds away flat for easy storage.

Fire Guard

## Spark guard

This spark guard is made from transparent stainless steel mesh so you can continue to enjoy the beauty of the flame even with the guard in place and the heat proof handle allows you to easily load logs when the screen is hot.

Spark Guard

• The Fire guard is available with or without the Aurora logo

# THE ENVIRONMENT

---

Firewood is the world's oldest fuel. It is also the most accessible & renewable energy resource for home heating. Its use can help to reduce greenhouse gas emissions because its net carbon dioxide emissions are far below those of all other fuels. Wood is energy from the sun, stored by the tree as it grows. When you burn wood you are releasing this stored energy. It is also the most cost effective fuel you can choose to heat your home. For more information on heating with wood visit our blog:

[www.aurorasuspendedfires.com/blog](http://www.aurorasuspendedfires.com/blog)

# CARING FOR YOUR FIREPLACE

---

To ensure you get the best from your Aurora Fireplace we recommend burning no more than four large logs (exceeding 110mm in diameter) at a time. Use untreated, air dried hardwood or split logs with a humidity content of less than 20%. Never burn trash, painted plastic, coated or preservative treated wood, waste or black coal. Never use petrol, oil or kerosene to help light the fire. Consult our website for information on cleaning and maintenance products or advice in the event of paint scratches:

[www.aurorasuspendedfires.com/support](http://www.aurorasuspendedfires.com/support)

# CERTIFICATION & QUALITY ASSURANCE

---

When you purchase an Aurora Fireplace quality is assured. Full warranty terms & conditions are available on our website. An approved installer should undertake a site survey prior to purchase and must install your Aurora Fireplace for you. Visit our website for a list of recommended installers. You may also view or download complete installation instructions from our website.

# OUR GUARANTEE OF QUALITY

---

We are committed to exceptional customer service and high quality workmanship. Please follow our operating instructions provided with your purchase to ensure you get the very best from your Aurora Fireplace.
