DELRAY / SINGLE SIDED

# The DelRay Square Universal Burner

A revolutionary burner system,  
creating endless opportunities

## Versatility

We have developed a burner system that is not only convertible from natural gas to propane, but can switch from traditional to contemporary burner media without changing the burner system.

Media kits such as logsets and contemporary scenes must be ordered along with the unit.

# TRADITIONAL LOGSETS

## Hand painted to perfection

Each logset is designed to work with the universal burner system that ensures a realistic flame pattern that fills the firebox

All logsets come standard with a black coal firebed and glowing ember media

SPLIT OAK

GREY COALS  
HW1265

Coals must be ordered with a logset, Black coals come standard with every DelRay Square logset system

# 152

DECORATIVE CONFIGURATIONS

## Versatility

Pair any Traditional Logset or contemporary scene with any of our seven liners to create a vision that's completely yours

Go even further and customize with a special coal or glass fuel bed

# CONTEMPORARY SCENES

## Modern design at its best

Our contemporary scenes have been designed to create the best possible environment for tall, robust flames and pair beautifully with any room

All contemporary scenes come standard with a fuel bed, rocks, and glowing ember media

### 170°F / 76°C Heat Vent

Heat is diverted through the Cool Wall Advantage kit, safely bypassing the space above the fireplace.

### 100°F / 38°C Cool Wall†

Wall temperature is cool, creating an area safer for mounting a TV, or hanging artwork.

### 510°F / 265°C Glass

Reduced glass temperature, combined with the provided screen creates a safe viewing area.

†100°F Wall temperature is taken at 12" above glass opening

## 1976: The Days Before Gas Fireplaces

In 1976, Montigo president and founder, Dan Binzer, started installing zero-clearance wood burning fireplaces for local builders in Vancouver, BC. Over the years, demand grew for a gas alternative, and Dan engineered and manufactured the first ever sandpan logset. The logset was installed in a zero-clearance wood burning fireplace hell, resulting in one of the first zero-clearance gas fireplaces on the market.

## 1985: Gas Fireplace Manufacturing Begins

Demand for gas grew rapidly, especially among multi-unit developments so Dan Binzer started a company called Canadian Heating that would offer full service design, engineering and manufacturing for gas fireplaces. Under the Montigo brand, Canadian Heating began manufacturing and selling a wide selection of zero-clearance gas fireplaces throughout Canada and in 1985 development began for the latest and greatest in gas fireplace technology – direct venting.

## 1994: Manufacturing Excellence is Achieved

Development and advancement of the gas fireplace continued over the years with continual developments to improve the efficiency of the fireplaces and perfected manufacturing processes to deliver an optimum fireplace each and every time – even for completely custom units.

## Present: Leading the Way with Modern Fireplace Design

As one of the first to bring a linear designed fireplace to market, Montigo now offers the largest selection of linear fireplaces demanded by designers, architects and homeowners wanting to create a modern and contemporary space and homeowners wanting to create a modern and contemporary space.
