About 21

“Quality is the pride
of workmanship”

– *W. Edward Deming*

designed by M Gooden Design photography by Parrish Ruiz de Velasco.

H Series

This vent-free gas linear fireplace features a contemporary, trimless, open front style and is designed with simplicity in mind. With zero clearance and vent-free technology you have

multiple benefits including ease of installation as well as greater flexibility in fireplace location all while delivering fuel efficiency ratings near 99%.

Designer Surrounds

Use our **online surround builder** to design your perfect H Series fireplace motif. Choose your frame and interior looks of metals, concrete or tile. Over 200 combinations to choose from.

See page 5 for more details.

Optional enamel interior enhances the flames

J Series Single Sided at Mendocino Farms, CA

J Series

This modern outdoor gas fireplace is the perfect accompaniment to a chic outdoor cocktail party or a simple and cozy fire with family and friends. The J Series outdoor fireplace is vent-free.

The M2 model features remote control, flame adjustment and multi-colored LED Illumination in the fireplace interior. This fireplace is also completely vent-free, offering you a greater flexibility for your outdoor patio design.

The **new JVF-40H** features a choice of two burner types. The Linear Burner creates an even line of flame that looks impressive with our glass fire media or Carrara Pebbles. The Campfire Burner has tapered flames on the sides and increases in height to the middle. Paired with the Log Set media it creates a natural campfire look.

G Series 42" installed by Texas Draft Co., TX

G Series

Looking for a custom design? The G Series linear gas burner provides a simple way to achieve the look of a custom fireplace with the flexibility of an approved dual listed vented and vent-free natural gas burner. This burner can be used in an existing fireplace or in a custom built fireplace project.

The G Series is available in 3 sizes as a drop in burner (shown above) or with the optional burner cover (shown below). The optional cover is useful for floor level installation because it hides away the controls and burner structure to provide a clean, modern aesthetic.

Add a modern touch to a vintage look

Gas Stones

For use in a wood burning fireplace or vent-free firebox, our Gas Stones eliminate the “log” look of traditional gas log sets and fireplace inserts. Clean, contemporary and thoroughly modern. If you’re looking for a modern alternative to gas logs, this is it. This minimalist design will provide you with a

calming, uncluttered presence in your fireplace for years to come.

Beautiful stones and driftwood crafted from fireproof ceramic sit atop a steel cover fully concealing the gas burner and controls. The burner cover is available in white or black.

About Us

At *European Home*, beautiful design drives everything we do. Founder, Holly Markham, evolved her business into fireplaces by embarking on study and research. Because of that dedication we now design and manufacture the highest quality modern fireplaces. From the materials we use, to the efficiency standards we hold, to the skilled hands and innovative minds behind every product – **every detail is considered completely.**

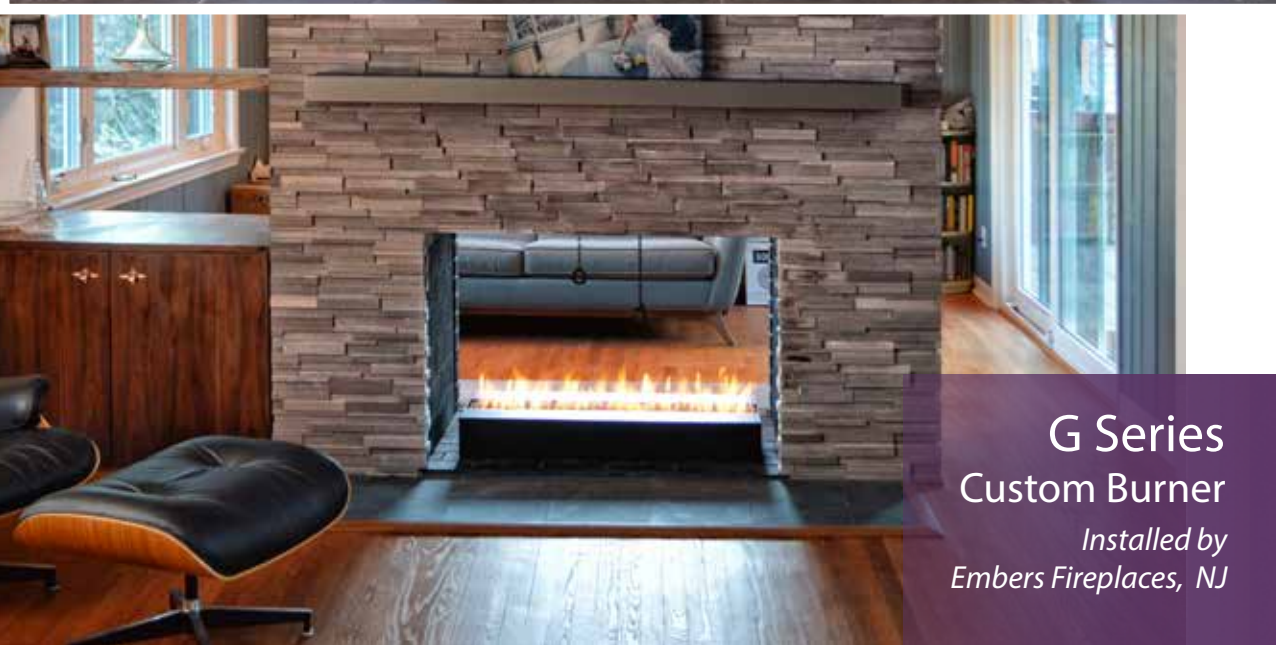

All European Home gas fireplaces are manufactured in the United States and are certified for use in North America.* In addition, European Home is the exclusive importer of the European brands Element4, Evonic Fires and Focus. These brands hail from the Netherlands, UK and France respectively.

**Some restrictions apply for vent-free products. Check your local guidelines.*
