

URBANA

LUXURY FIREPLACES

OVER 30 YEARS IN HEARTH

Sherwood Industries Ltd. is the manufacturer of the Urbana alongside Enviro and has been an industry leading hearth company for over 30 years. Our factory is nestled in the Pacific North West, where hard work and ingenuity come together to create innovative fireplace products that our customers can enjoy and appreciate for years to come.

THE URBANA ADVANTAGE U30 | U50 | U70

COOL WALL

Fireplaces can be framed in with combustible materials such as drywall, veneer, shiplap, etc.

3D STAINLESS STEEL BURNER

A stunning new three dimensional fireplace design that adds a “wow” factor to your flame.

OPTIONAL WIFI CONTROL

Your mobile phone can control your Urbana fireplace using services such as Google Home or Amazon Alexa.

DOUBLE GLASS SAFETY

Urbana fireplaces use a second layer of glass for hot surface protection instead of steel mesh alternatives.

TOP FIREBOX LIGHTING

Adjustable top lights come standard on all Urbana fireplaces and are controlled via an included remote.

NO STEEL PILLARS

Instead of thick metal bars, Urbana fireplaces use a transparent glass-to-glass construction that lets you enjoy the fire from any angle.

COOL SURFACE SYSTEM

Our Cool Surface System helps channel rising heat within the chase, protecting wall mounted valuables such as paintings or HDTVs.

INVISISEAL SYSTEM Patent Pending

The interior glass panes seal to each other using our proprietary Invisiseal System. Invisiseal uses formed silicone for a no-mess, airtight and re-usable glass seal.

U70

Fluted Liner

Driftwood Log Set

Glass Size:
19 $\frac{3}{4}$ "h x 70"w

Viewing Size:
17 $\frac{3}{8}$ "h x 70"w

SINGLE SIDED INSTALLATION KIT

Your Urbana Fireplace can also be installed flush with the wall, using a Single Sided Installation Kit. This flush install gives the fireplace a traditional build but retains it's impressive 19" height and removes the need for a steel wire safety screen by taking advantage of double glass surface protection. These kits are available for the U50 and U70. Just another reason that Urbana Luxury Fireplaces are the perfect fit for any new build.

- Fluted Liner
- Infinity Glass Liner - Black

COMPATIBLE WITH MOST FINISHES

The low heat nature of Urbana fireplaces allow you to use a large variety of combustible finishes during framing. Here are some examples.

Drywall

Shiplap

Tile

Fabric

Wood

Imitation Stone

Marble

U30 | U50 | U70 VENTING SOLUTIONS

Every Urbana fireplace is designed with our COOL SURFACE SYSTEM which allows air coming into the fireplace to be heated and rise up safely within the chase, protecting wall mounted valuables from unsafe temperatures. This gives you the freedom to decorate your room without the worry of heat damage over the long term. Rising heat exits the top of an open chase; however, we have additional venting options if you wish to frame the chase all the way up to the ceiling.

HIDDEN INTAKE CONSTRUCTION — URBANA EXCLUSIVE

Where approved by local codes and the building's HVAC supplier, the chase intake air may be supplied from a basement or conditioned crawl space below if no visible open area is desired at the bottom of the chase.

SHADOW LINE

Fans pull air into the unit through a gap beneath the fireplace's "plinth" or "lower construction".

FLOOR VENTS

The "plinth" or "lower construction" is finished to the floor and optional floor vents are installed on the left and right sides to allow for air intake.

TOP SHADOW LINE

The chase is constructed leaving an open gap at the ceiling allowing rising heat to freely enter the room.

FORWARD FACING VENT

Optionally, you can channel the rising heat through a forward facing vent with a paintable bezel.

SIDE VENTS

Side vents are also available and operate by exiting hot air out the left and right sides of the chase.

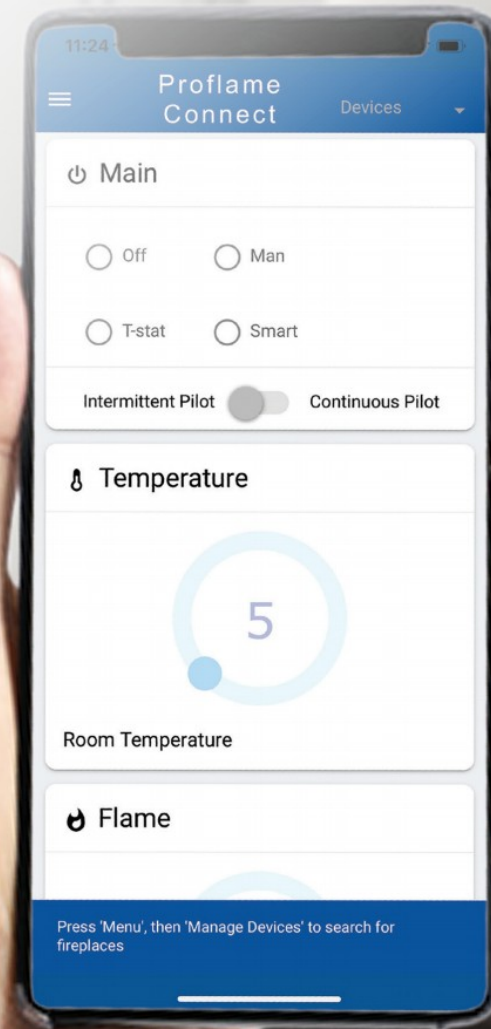

HDTV SAFE

HDTV's are able to be wall mounted as low as 4" from the top of the glass.

WIFI CONTROL

By adding Wifi adaptor you can unlock modern capabilities of your Urbana fireplace. With app enabled technologies, you can enjoy your new Urbana fireplace with total control always at your fingertips.

COMFORT KIT

Our available Comfort Kit is an installation option that allows excess rising heat to be channeled outside through an exterior wall behind the fireplace. This setup allows you and your loved ones to enjoy a beautiful flame at comfortable temperatures.
