

A woman is relaxing on a wooden lounge chair on a deck. She is holding a smartphone and looking at it. The deck is made of light-colored wood. To her left is a large window with a dark frame. Above the window, a long, rectangular heater with a decorative orange and white pattern is mounted. The background shows a lush green landscape with trees and a bright sun setting or rising, creating a warm, golden glow. The overall scene is peaceful and inviting.

EUROfase

Where comfort & design meet outdoor living

At Eurofase Heating, we pride ourselves on developing products that meet the highest quality and safety standards while at the same time keeping our eyes on the latest architectural trends to ensure that our products bring added function and form to your space.

Imagine investing in patio furniture, a BBQ grill, or any other expensive outdoor furnishings but not being able to enjoy your space all year round because of weather constraints. Forced air heating systems can be ineffective in outdoor spaces, which may lead you to use structures such as fire pits. Although beautiful, its inability to heat large spaces or have ease of control may create more strife than pleasure.

At Eurofase Heating, we choose **infrared**

Infrared heaters emit a clean and safe beam of light that primarily heats objects rather than the surrounding air. This results in an immediate feeling of warmth. Infrared heat is evenly distributed and unaffected by factors like drafts or wind, providing consistent comfort.

Instant Heat

No Greenhouse Gases

Silent Operation

Behind the Name:

Light rays that are below red in the spectrum are not visible to the human eye but have the highest temperature of all the colors. That light is known as "Infra (below) Red".

Indoor/Outdoor

No Ventilation Required

Low Maintenance

Eurofase Heating has an ideal approach to keep you warm. Infrared heaters instantly distribute heat evenly without having to worry about ventilation requirements or wind conditions. These silent heaters enable you to enjoy quality time with friends and family indoor or outdoor. Eurofase Heating helps create a safe and sustainable space for yourself and your loved ones!

EF15

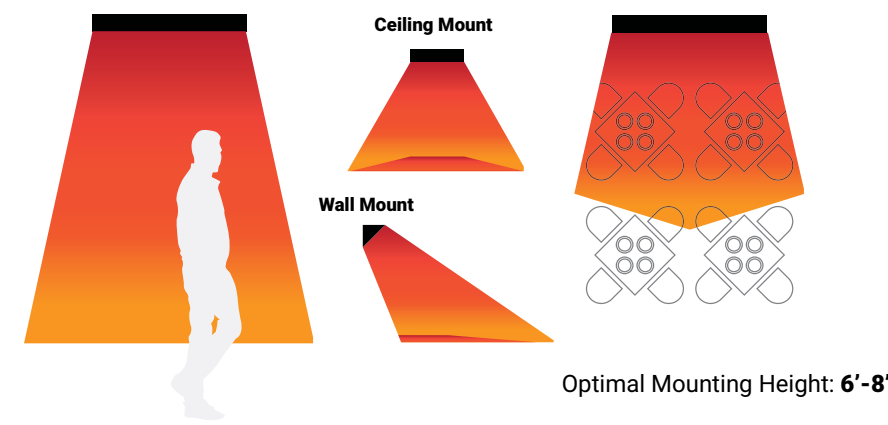

39" 1500 WATT ELECTRIC SINGLE QUARTZ ELEMENT HEATER

FEATURES

We Do Custom

At Eurofase Heating, we aim to provide you with purposeful products that will add more value to your space, expanding your range outdoors.

We not only want to provide you with a heater that fits in your space, but we also want to make sure it belongs there. Eurofase's team can help you customize the heater décor plates with our metal laser cutting capabilities that can produce special shapes and letterings to spark your uniqueness.

Eurofase Heating takes pride in our designs and stands at the forefront of innovation, passion, providing our customers with exactly what they need.

It's Up To Hue

Our customization abilities do not end at metal laser cutting of décor plates. With our resources, we can accommodate a large assortment of custom colors to visually enhance your space based on your needs.

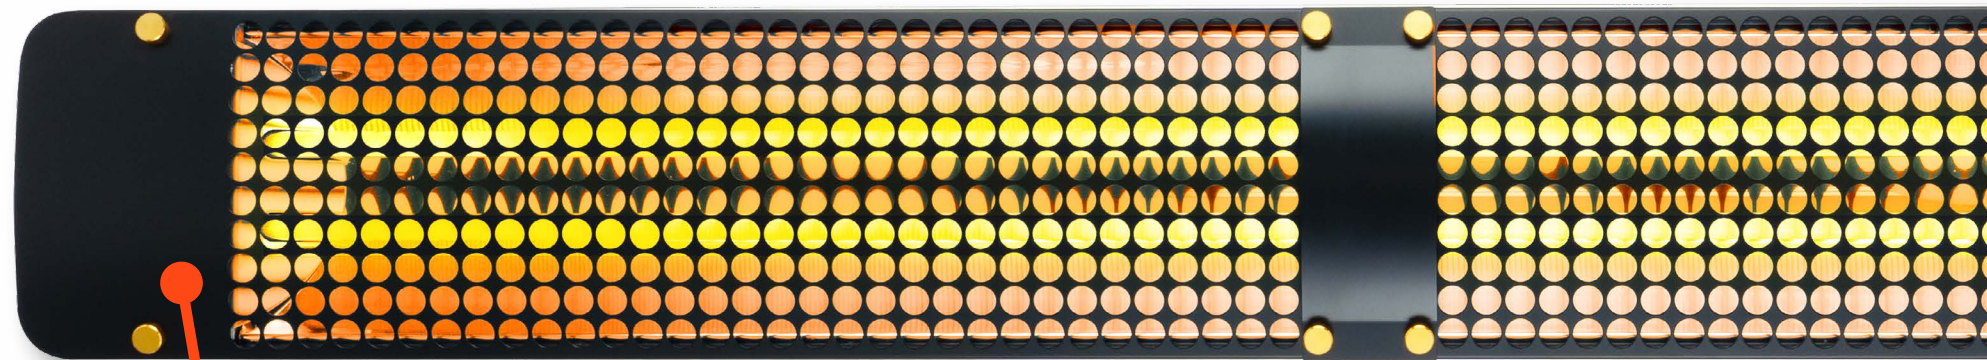

From the design concept to product engineering, Eurofase Heating can manufacture and produce your custom design.

Get in touch with one of our dealers to get your Eurofase heater customized.

5 Years Southern Florida Sun Rating.
Powder Coat finishes are super high durable for exterior coating protection.

Inspired by the Eurofase Admiral's metal rivet accents & filigreed metal design

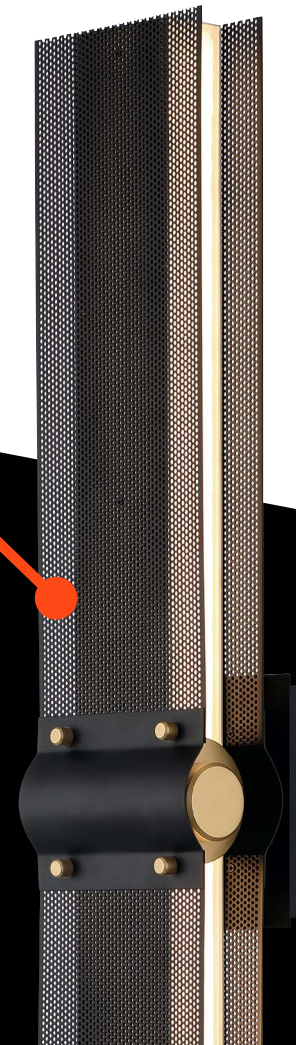

Detailed metal rivet accents & filigreed metal design completes the aesthetics of the Admiral

By the way...

Did you realize that Eurofase heating décor plate designs take cues from the aesthetics of Eurofase's lighting fixtures?

For smooth integration and a harmonious design of your space, combine our lighting to stay warm and cozy outside, while staying in style.

Complete Your Setup with Our Accessories

FLUSH MOUNT KIT

Ideal for both indoor and outdoor applications in commercial or residential settings and crafted from durable 304 stainless steel, it is built to withstand the elements, ensuring long-lasting performance.

Eurofase provides these Flush Mount Kits in a standard Black, Stainless Steel or White finish and offers the option to upgrade a custom finish to complement any patio decor.

- Note: The flush mount Kit comes with:
- Flush Mount Frame
 - A 4' 4-wire High Temperature Whip
 - Brackets and other mounting accessories

HIGH TEMP. WHIP

As one of the leading manufactures of infrared heaters, Eurofase Heating continues to innovate and bring solutions to the industry. Available in multiple lengths, our 4-wire high temperature whip is resistant to rust, cracks and heat damage.

SUSPENSION KIT

Enhance your design options with Eurofase's Suspension Kit, an ideal choice for spaces featuring high or sloped ceilings. Specifically crafted for flexible installations, this solution caters to various ceiling types, particularly in areas where heaters are placed above the 12-foot threshold.

Did you know...

For optimal heat coverage, we recommend installing the heater between 8ft to a maximum of 12ft. In cases of higher ceiling applications or slope ceilings, it is advisable to use the suspension kit for proper positioning.

Compatible with:

TIMERS & DIMMERS

At Eurofase Heating, we strive to provide our customers with the means to create a cozy, comfortable space with a single press. We make having a luxurious and relaxed environment easy with our controls so that you can enjoy your space no matter your preference.

All Eurofase heaters are compatible with timers, dimmers and a combination of both to give you the ability to optimize the infrared heatwaves emitted from our heaters (a control box is required to enable dimmer functionality). This helps you moderate the flow of heat from 0 to 100 percent along with giving you the absolute flexibility to choose how long you would like the heater to run.

Custom configurations (weather proof, surface mounted, etc.) are available.

TIMER (ONLY)

SKU#: EFSWT

DIMMER (ONLY)

SKU#: EFSWD

Good to know...

To ensure optimal performance and longevity of the heater, it is recommended to observe a 15-minute cool-down period after 4 hours of continuous usage. Our timers are specifically designed to contribute to optimal heater performance.

CREATE YOUR SPACE

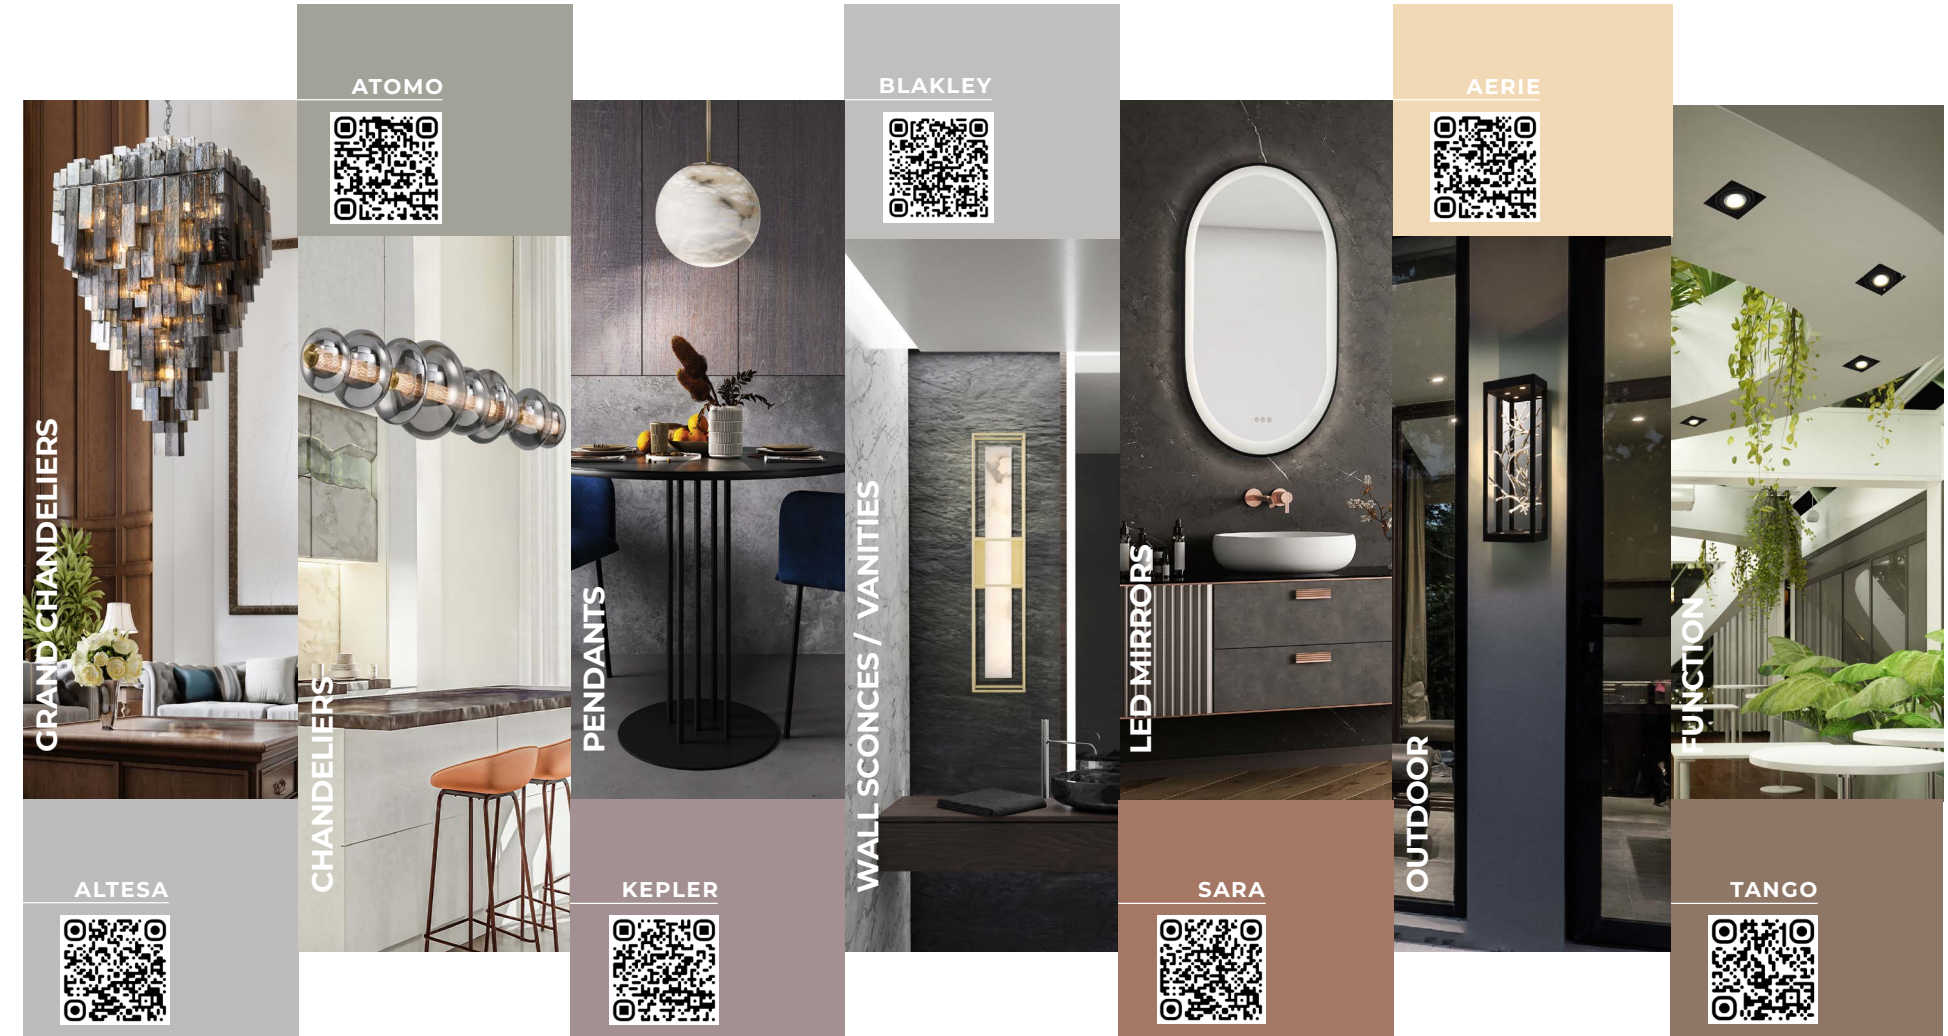

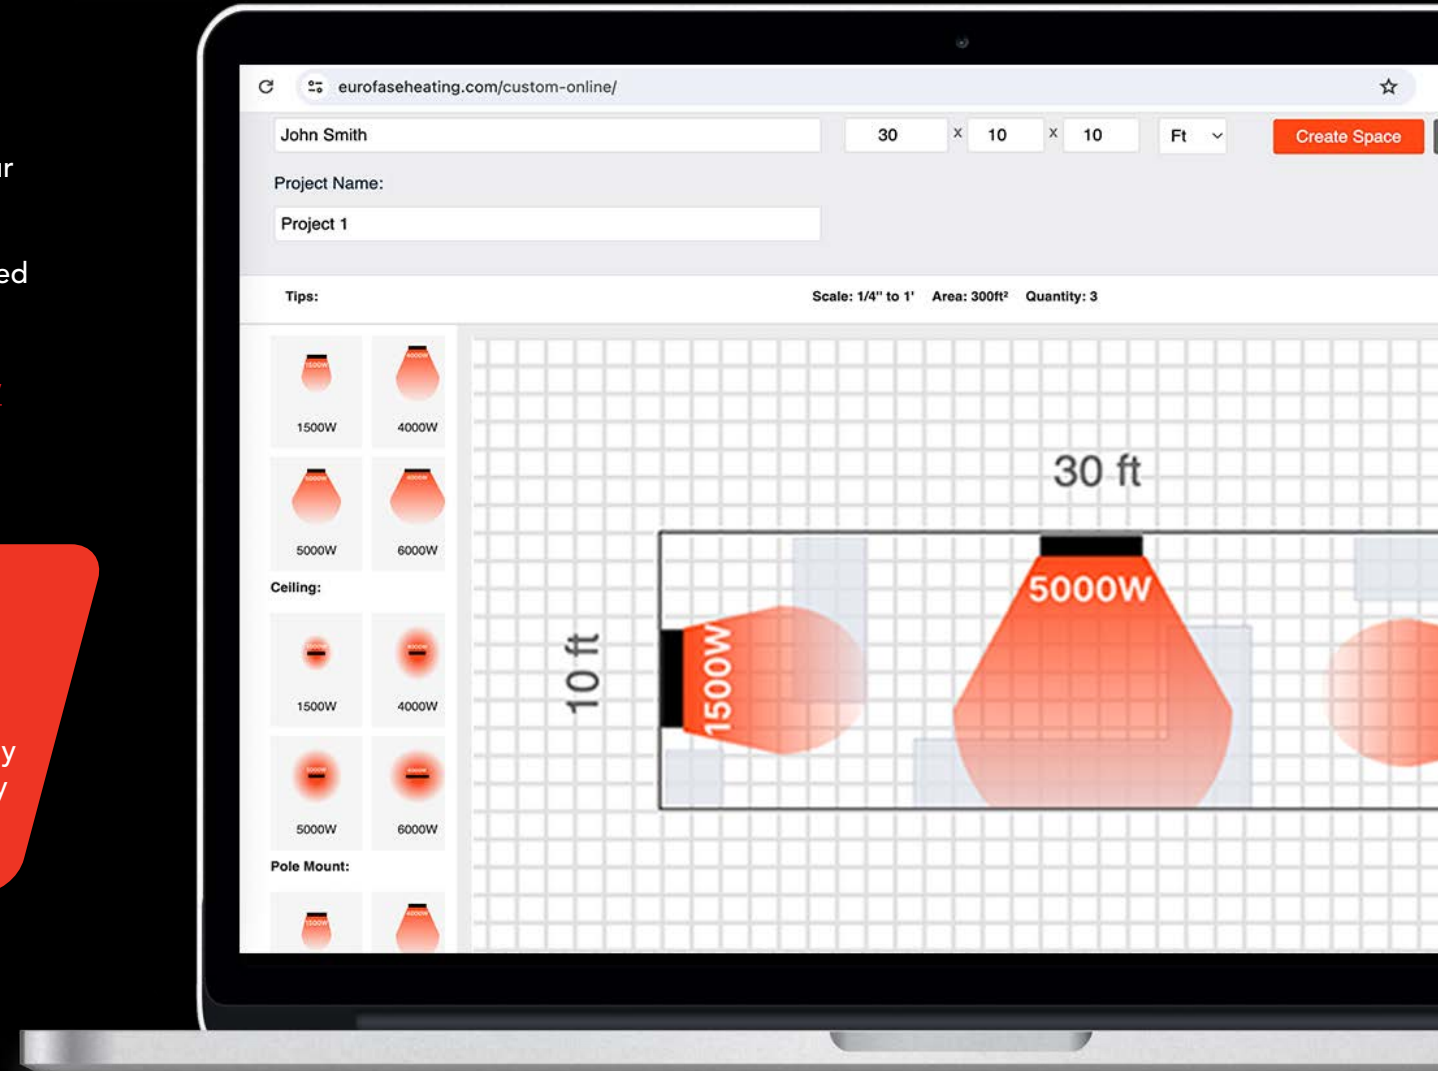

VISIT US ONLINE

Take control of your space with our user-friendly, drag-and-drop tools. Achieve the optimal layout by dragging and dropping the selected heater into your space to simulate the heat coverage.

eurofaseheating.com/createyourspace/

PRO TIP

It's better to slightly overheat a space than to underheat it. Choosing a slightly larger heater ensures better coverage, especially with infrared heaters that primarily heat people and objects.

DESIGN VISION

Creativity (*forward thinking*), originality (*individuality*), influence (*social and environmental*), and excellence (*quality*), are the key design values of Eurofase.

These concepts support a perspective that shapes and symbolizes the fusion of lifestyle, luxury, and timelessness.
