FIND YOUR HAPPY (fire)PLACE.

Throughout the ages, people have gathered around fires to share in life's greatest joys.

There's just something about the glow of flickering flames that makes special moments feel even warmer.

A Napoleon fireplace is uniquely designed to brighten the vibe of any room in your house. Napoleon has an incredible range of designer options to fit any vision.

A fire not only raises the warmth and ambiance of a room, it can raise the value of your home. A fireplace offers some of the highest returns of any remodeling project. And that should make you feel good all over.

And so you can keep enjoying that positive glow for years and years and years to come, every Napoleon fireplace is backed by the President's Limited Lifetime Warranty.

Napoleon's Hot Spots Research Study delivers insights on key areas of the home. In particular, how to help you add relaxation, social interaction and functionality to rooms to enhance your memorable moments.

Throughout this brochure we will share some of our insights with you.

See your dream fireplace come to life in front of your eyes! Scan here to visit Napoleon's Fireplace Design Studio and build your custom fireplace with available design options.

Ascent™ 30

Infinite Opportunities

Napoleon's Ascent™ Series has endless opportunities and is perfect for home builders and homeowners alike. The Ascent™ 30 is the smallest fireplace in the series and is the perfect option when space is at a premium. With up to 15,000 BTU's and Napoleon's exclusive PHAZER™ glowing log set, it provides plenty of cozy heat.

Heat Management

Napoleon prides itself on innovation and creating a comfortable environment for the room you live in by getting the most enjoyment possible out of that room – that means creating heat management solutions. Heat Management allows you to install your television, art, and electronics closer to your fireplace; and can even move the heat to another room – or even outside!

WHAT IS HEAT MANAGEMENT?

Heat management is the ability to move the heat from your fireplace to exactly where it's needed, which isn't necessarily directly in front of the fireplace.

Heat management has several benefits including:

- Designed for TV installs, electronic and sensitive artwork
- Reduction of mantel height and depth from standard clearances
- Easier installation of mantels
- Move heat from the fireplace to spaces where it is needed
- Cooler glass on some models, increasing fireplace safety for families
- Cooler walls near the fireplace

Napoleon has several different heat management options depending on the fireplace you choose.

Closest distance allowable for TV to Fireplace

TYPES OF HEAT

Radiant

Radiant heat is effective for warming an immediate space around a fireplace. This involves transferring radiant energy to objects from a source that emits heat directly (like the sun). Radiant heat is a feature of all Napoleon fireplaces (except the Luxuria series).

Convection

Convective heat creates more even heat around the room by way of drawing air from floor level that is then heated and rises away from the fire and into the room. The hottest air in the room rises to the ceiling with warmer air remaining in the lower part of the room.

Forced Air

Forced Air increases the heat transfer into a local area by way of force with a fan. Forced Air circulates the warm air into the room faster.

NAPOELON'S HEAT MANAGEMENT SYSTEMS

UNIVERSAL HEAT MANAGEMENT (UHM/UHMF)

Operates without the need for electrical or blowers. Using a set of ducts, the heat is efficiently circulated around the room instead of blowing directly from the front of the fireplace. This is a silent system, which is ideal for spending quality time with loved ones watching a movie or reading. UHM lowers clearances for combustibles and allows for the safe installation of electronics above the fireplace.

Compatible with Ascent™ BX (BX36, BX42) and Ascent™ Deep (D42, DX42)

HOT AIR DISTRIBUTION KIT (LHAD)

Effectively moves warm air from the fireplace into a different room using flexible ducting. For rooms where the fireplace is at one end of the room, LHAD moves the heat to other areas within the space.

Compatible with the Ascent™ BX (BX36, BX42) Ascent™ X (GX36, GX42, GX70) and Ascent™ Deep (D42, DX42)

Enhance Your Ember Bed

Napoleon Fireplaces offers an entire line-up of completely customizable, media enhancement kits. The three kits are; the Beach Fire Kit that consists of 4 driftwood logs, a Shore Fire Kit that consists of rock, sand, vermiculite and glass and a Mineral Rock Kit that consists of rocks in a variety of shapes, sizes and colors. These kits can be used as stand alone media or you can pick and choose elements from all 3 Kits to be mix & matched to create a custom look.

Completely customize your fireplace to your desired style.

Beach Fire Kit

Comes with four driftwood logs

The Beach Fire Kit includes four pieces of driftwood styled logs.

Shore Fire Kit

Comes with a variety of Rock, Sand, Vermiculite and Glass

The Shore Fire Kit includes a well balanced mixture of rocks, sand, vermiculite and glass available in various sizes.

Mineral Rock Kit

Comes with rocks in a variety of shapes, sizes and colors

The Mineral Rock Kit is a mixture of different sized rocks in black, red, blue and grey.

Consult your owner's manual for complete installation instructions and proper clearances to combustible materials. Check all local and national building codes and gas regulations. All specifications are subject to change without prior notice due to on-going product improvements. Products may not be exactly as shown. Flame height and activity is influenced by varying vent configurations and may not appear as shown. Napoleon® is a registered trademark of Wolf Steel Group Inc. EnerGuide - A Canadian efficiency standard based on frequent, short start-up and cool-down cycles. All appliances sold in Canada are subject to this EnerGuide rating system. AFUE- A US efficiency standard (Department of Energy) based on extended on/off cycles, more typical of fireplace usage. Steady State - Reflects the highest possible overall heating efficiency.
