LINEAR SERIES GAS FIREPLACES
napoleon.com

NAPOLEON

Linear Gas Fireplaces.
Limitless Possibilities.

Napoleon's linear gas fireplaces, the award-winning Vector™ and Luxuria™ series, as well as the Ascent™ Linear provides you with an elegant fire element allowing the flames radiant glow to enhance every room

Napoleon's innovative Bluetooth enabled **eFIRE** app can be accessed from your mobile device and used to control everything on your fireplace (flame height, LED ember bed colors, blower and more).

Napoleon's industry leading Heat Management allows for installation of combustible materials up to the fireplace opening. This heat management system eliminates the need for loud power vents, fan systems or blowers to provide better heat distribution. Take advantage of simple installation framing and easily install your televisions, sound bars or artwork above the fireplace to truly customize your home decor thanks to the drastically reduced temperatures above the fireplace.

Please note, colors and finishes of decorative panels, log sets and accessories may vary.

See your dream fireplace come to life in front of your eyes! Scan here to visit Napoleon's Fireplace Design Studio and build your custom fireplace with available design options.

The Single Sided Vector™ 38 shown with Dynamic Heat Control™ installed and Shore Fire Kit and Wrought Iron Globes.

Vector™ Series

Sophisticated Fires

Napoleon's Vector™ series of linear gas fireplaces is the perfect fit for any room to make a statement in your home. Customize your fireplace with our selection of designer surrounds, choose a different surround for either side of the See Through Vector™ units to match or enhance your current décor. Napoleon's Vector™ Series can also be dressed to match any interior design with dozens of media options available, the possibilities are endless. Optional Dynamic Heat Control or Ducted Heat Management allow for zero clearance to combustibles and designed for TV installations.

Luxuria™ Series

Limitless Possibilities

Make a spectacular statement with Napoleon's Luxuria™ series of gas fireplaces. Thanks to our Vesta Award winning Premium Glass Guard system, there is no safety screen required, enhancing your view of the brightest flames in the series. Choose a Single Sided unit or maximize your viewing pleasure with a See Through model. This versatile series allows for easy installation of electronics, artwork or other heat sensitive items directly above the unit, and combustible material to be installed flush to the opening. In combination with premium media options, the Luxuria™ series offers endless installation opportunities.

Ascent™ Linear Series

Boasts Beauty and Performance

With multiple designer options, Napoleon's Ascent™ Linear Gas Fireplace Series is ideal for making a dramatic statement in your home. A Topaz CRYSTALINE™ ember bed is included with the Ascent™ Linear and adds shimmer wherever it's installed. Customize the look by using the optional Beach Fire, Shore Fire, or Mineral Rock enhancement Kits, and you can even mix and match Kits to enhance your personal style. Use the optional eFIRE app and your favorite mobile device to control this fireplace with ease from the comfort of your chair. Available with Napoleon's industry-leading heat management systems, easily install your television, electronics and sensitive artwork closer to your fireplace, increasing design flexibility. Perfect for homeowners, remodelers and even builders who wish to add something special to a space.

FOCUSED ON VERSATILITY.

HEAT MANAGEMENT

Heat Management serves many purposes and offers several benefits. With our innovative systems, easily install your television, electronics and sensitive artwork closer to your fireplace, increasing design flexibility. These industry-leading technologies offer a more effective and quieter solution than standard blowers and operate without power. For a simpler installation, heat management reduces clearance to combustibles and allows for an easier installation of mantels. Finally, cooler glass and walls near the fireplace ensure that you and your family can safely enjoy the comfort and light of a gas fireplace. With our Heat Management Solutions, you control the heat.

PREMIUM GLASS GUARD

UNIVERSAL HEAT MANAGEMENT

Using a set of ducts, the heat is efficiently circulated around the room instead of blowing directly from the front of the fireplace. Operating without the need for electrical or blowers, this is a silent system which is ideal for spending quality time with your loved ones watching a movie or reading. UHM lowers clearances for combustibles and allows for the safe installation of electronics above the fireplace.

Compatible with the Ascent™ Linear Series.

DYNAMIC HEAT CONTROL™

No ducting, fans or power required to circulate the heat ensuring silent operation. Allows you to design and build your space, completely integrating a fireplace into the décor with true zero clearance to combustible materials. An industry-leading system that has been designed for your TV or artwork to be installed directly above the fireplace. Napoleon's Luxuria™ Series fireplaces include the Dynamic Heat Control™ System and Premium Glass Guard, providing a completely unobstructed view of the tallest flames in the Linear Series, eliminating the need for safety screens!

Compatible with the Luxuria™ and Vector™ Series.

DYNAMIC HEAT CONTROL™ PLUS

A powered solution that allows heat to be pulled from the fireplace enclosure and directed to any living area in the home that needs it, including outdoors when not needed inside your home. This system is as quiet as a bathroom fan. Easily install a TV above the fireplace. Uses variable speed which allows the installer to reduce the fan speed to suit the specific installation and minimize any sound.
Compatible with the Luxuria™ and Vector™ Series.
OPEN ENCLOSURE

Stopping shy of the ceiling allows rising hot air to escape freely from the top of the enclosure and into the room.

FRONT OPENING

Uses an air outlet opening that will be built into the front of the constructed enclosure, at the top, centered above the appliance.

HARD VALANCE

Stopping shy of the ceiling, allows rising hot air to escape freely from the top of the enclosure and into the room.

REAR OPEN ROOM

This style of enclosure includes an air outlet opening that will be built into the rear of the constructed enclosure above the appliance.

DUCTED HEAT MANAGEMENT

Offers the greatest amount of flexibility for installations with front venting, side venting and off-the-side termination. This passive heat management system requires no fans or blowers for silent operation. The temperature directly above the fireplace is drastically reduced and safely distributed, allowing for the installation of electronics or fine art directly above the fireplace without fear of heat damage. The ultimate in flexible design with true zero clearance to combustible materials.

The Ducted Heat Management System is built with termination plates and ducts. An industry-first termination plate installation offers homeowners the benefits of off-the-side venting and room divider installations, as well as providing a way to safely pass cables through the wall for ease of electronic installation.

Compatible with the Luxuria™ and Vector™ Series.

**Termination plates are for Vector™ appliances only.
