Included controls

eFIRE mobile app

Providing a more connected and convenient experience by controlling every setting right from your mobile device. This includes: on/off, flame height and blower speed AND the ability to choose any color imaginable for the ember bed to suit your space or mood!

Remote

Enjoy added convenience with the included remote—control every function of your fireplace, including power, flame height, and blower speed, from the comfort of your couch.

Optional heat management

Dynamic Heat Control (DHC)

Enhance performance and lower wall temperatures. This system works without a fan for quieter operation and is perfect for situations where heat-sensitive objects, like a wall-mounted TV, need to be placed directly above the fireplace and recessed. It offers the lowest height clearances for TV or artwork installations.

Dynamic Heat Control Plus (DHC+)

Add this system to your DHC to move the heat to the outdoors.

Ducted heat management (DHM)

Offers the greatest amount of flexibility for installations with multiple configurations available, including an option where you can install the fireplace as a room divider and safely pass cables through the wall for ease of electronic installation. Enjoy true zero clearance to combustible materials without fear of heat damage.

Hot air distribution kit (LHAD)

Efficiently moves warm air from the fireplace to a different room or outdoors using flexible ducting.

Innovations

More efficient use of gas

With its impressive flame height, this innovative design ensures optimal heat output while operating efficiently. Napoleon recognizes the global shift towards environmentally-friendly solutions and is dedicated to offering sustainable products and practices.

Direct vent

Effectively removes exhaust and fumes from your space, keeping your indoor air clean while also conserving energy.
