Included cover

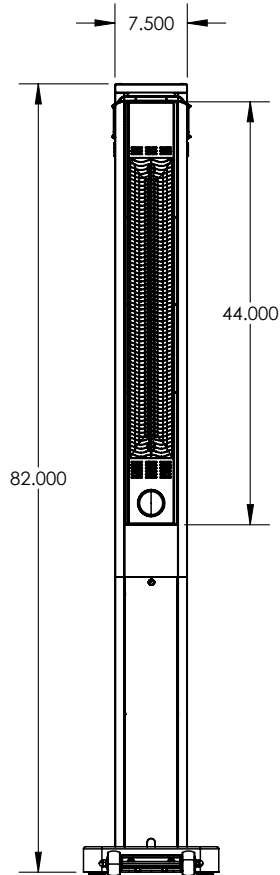

**Efficient and Focused Exactly Where You Need It**

Infrared heat delivers direct, radiant warmth to people and objects, ensuring more efficient and effective heating. In contrast, some heaters use convection heat to warm the air, which quickly dissipates in outdoor settings, leading to less usable heat and greater energy waste.

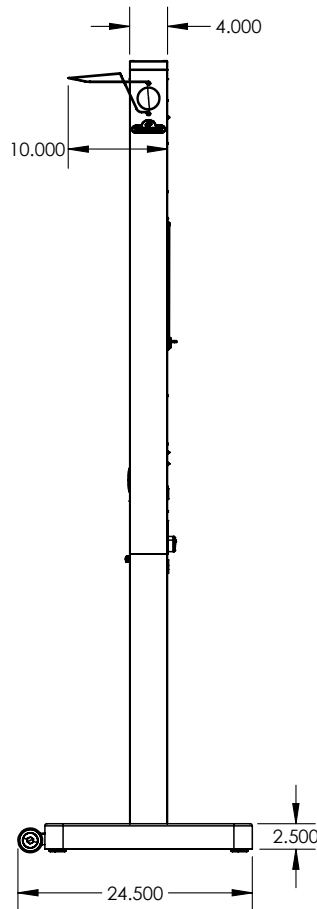

FEATURE	INFRARED HEAT	CONVECTION HEAT
High heat output	✓	✓
Direct radiant heat	✓	
Warms people and objects	✓	
Warms surrounding air		✓
Minimizes heat loss	✓
